

MANAGEMENT DEVELOPMENT PROGRAMME (MDP) ON FORECASTING FOR BUSINESS EXCELLENCE

NITIE
National Institute of
Industrial Engineering

Prof. Priyanka Verma

Prof. Sushmita Narayana

Prof. Debabrata Das

ABOUT THE PROGRAMME

Aims to acclimatize the participants with the fundamental concepts of forecasting techniques to leverage business competitiveness. NITIE faculty has been working on different domains of applications in Statistics & Operations Research and is actively involved in consulting and applied research projects. This will facilitate participants to understand the application of concepts in the industrial setting.

OBJECTIVES OF THE PROGRAMME

Upon successful completion of this program, participants

- will be familiarized with the concepts of forecasting.
- will be able to apply various forecasting models in real life decision making, specifically in the context of operations and supply chain management.
- will learn coding and solving the forecasting problems in Python/R.

PROGRAMME COVERAGE

This training program is designed for web-based learning with hands-on exercises for executives in managerial positions in any organization. The topics covered include the following:

- Basic Components of Forecasting
- Different Techniques of Forecasting (Time-Series, Holt's Model, etc.)
- Errors in Forecasting
- Selection of Best Forecasting Methods and their uses
- Applications of various Forecasting Techniques in Operations and Supply Chain Management.
